US OF THE GALLBLADDER

CLINICAL HISTORY: RUQ pain.

TECHNIQUE: Realtime sonographic images were obtained in multiple projections.

COMMENTS:

The visualized liver is of uniform echo texture without evidence of mass or defect. There is no intra or extrahepatic biliary ductal dilatation. The common bile duct measures up to 4 mm. The gallbladder is physiologically distended with multiple calculi. The gallbladder wall is thickened measuring 6 mm however there is no pericholecystic fluid.

Reported positive murphy's sign.

The visualized portions of the pancreas are unremarkable.

IMPRESSION:

Multiple gallstones with a thickened gallbladder wall and reported positive Murphy's sign. These findings are concerning for acute or chronic cholecystitis. Please correlate clinically.
